Hi all,  
FYI, the latest installment from Samantha. I've saved this to the share drive as the latest master and will start to revise in response to Samantha's comments today.  
Sue

P.S. Samantha did a great job reviewing this TR. It's worth looking at her markup to see the lens that she uses in reviewing a TR.

> Hi,  
>  
> So, I was able to read through the remainder of the noncancer dose-response (pages 2-8 to 2-17) and some of the cancer hazard and dose-response (but not much). I didn't get as far as I had hoped but I am going to call it quits for now. I will definitely read the cancer when i'm back as apparently I've saved the best for last. Although, considering how the assessment has been so far, I doubt I have any major comments.
